Milestones of my career

Setup India UX team

Built an excellent team of Experience designers and UX writers at Archer, India. Helped the team to create a design culture that works effectively and efficiently with Engineers and Product Stakeholders.

Dashboard Modernization and Customer Satisfaction Boost

Transformed Archer dashboard to a modern UI, improving user experience and functionality. Achieved notable increase in Customer Net Promoter Score (NPS), demonstrating enhanced user satisfaction.

Conducted the most extensive user research initiative

Collaborated with UX Research partners in conducting the most extensive research effort in the company's history to fully understand the market, competition, business goals through interviews, observation, and user testing.

Redefining stock trading in India

As of July 2021, 26% of active stock traders and investors in India use at least one product we designed. That is 5.2 million users every day! one product we designed. That is 5.2 million users every day!

Creating UX strategies for products around the globe

As UX strategist for Microsoft Accelerator, I have assisted over thirty startups from India, Israel, and Germany shape their digital products for a better UX.
